Modified 01/12/2023

Installation Instructions

DBU installation automatically includes DBU, DBU Audit & DBU RDi.

RDB Connect installation provides the IBM i install.

back to software download

The example below uses the DBU executable for the install. All software installation methods are identical.

Step #1

Once you have clicked on the link to start the download process, the following screen will appear. Click on the **Save** button to save the installation file to your local computer.

Opening DBU11.exe	×
You have chosen to open:	
DBU11.exe	
which is: Binary File (6.2 MB) from: https://dodbu.com	
Would you like to save this file?	
	Save File Cancel

Figure 1-1

Once you have clicked on the **Save** button, choose the directory to which you would like to store the executable.

6 Enter name of file to	o save to	- 1-1,00 conten			×

Libraries					
 Music Pictures Videos 		• [t.
File <u>n</u> ame:	DBU11.exe				•
Save as <u>t</u> ype:	Binary File	(*.exe)		Save Can	 cel

Step #3

Once you have clicked the Save button, the installation file will be downloaded to your local computer. A screen showing the progress will appear. Please be patient during this process.

Figure 3-1

If you have a previous version of DBU installed, please ensure no one is accessing DBU by running WRKOBJLCK OBJ(DBU11/DBUUSERS) OBJTYPE(*FILE)

Once the installation file has been completely downloaded, locate the executable on your computer and double click to begin installation.

Figure 4-1

Click on the Run button to install DBU

Open File	- Security Warning
Do уо	u want to run this file?
	Name:rs\Olvera\Documents\DBUDownload\DBU11.exe

Type the IBM i (AS/400) host **IP/DOMAIN** where you wish to install DBU, type a valid **User Profile** and **Password** for the IBM i (AS/400) host computer you are connected to in the space provided. Then click the **Next** button to continue the installation process. (A dropdown list will include a list of IP address that have previously been created through a connection to your IBMi.) Leave the default library name unless you want to rename your library.

Figure 7-1

Step #8

The installation process requires a connection being established to your IBM i (AS/400) host computer..

Once you have verified the connection to your IBM i (AS/400) host, click the **Next** button to continue the installation process.

Check the box to display installation logs.

Note: This installation requires that your PC has an active network connection to your IBM I and JAVA installed.

Note: Installation requires *IOSYSCFG authority.

A subsystem description called DBURDBSBS will be created and started during the installation process. More More information about DBURDB can be found at the following link: http://www.prodatacomputer.com/dbu.shtml#dburdb

A connection test will be performed against the IP Address, User ID and Password on the IBM i (AS/400) host computer.

A progress bar will appear while we make a connection to IBMi and verify that your OS is at V6R1M0 or above and check if *FILE DBUUSERS is not in use.
